

Aarav Mehta

Software Engineer

Bengaluru, India aarav.mehta@example.com Fictional sample

01 Professional profile

Software Engineer with an illustrative 11-year career focused on event-driven services and maintainable product platforms. Core strengths include TypeScript, Java and PostgreSQL. Selected examples describe the challenge, contribution and handover materials.

02 Professional experience

Jul 2022 – Present

Software Engineer

Asterline Digital Systems · Bengaluru

Delivered defined workstreams in event-driven services and maintainable product platforms, coordinating reviewers and delivery partners.

- Designed idempotency keys, a transition ledger and replay tests; separated the service changes from the wider platform rollout.
- Built a versioned release checklist and health-check endpoints, then tested recovery paths with the on-call team.

Jul 2018 – Jun 2022

Software Engineer

Northmere Digital Systems · Bengaluru

Built a scoped practice in event-driven services and maintainable product platforms, with a defined review process.

- Used TypeScript and API design on assigned work; recorded decisions so colleagues could understand the approach.
- Prepared handover materials and incorporated specialist feedback before closing the workstream.

Jul 2015 – Jun 2018

Graduate Software Engineer

Cedarfield Digital Systems · Bengaluru

Built foundations through supported assignments, observation and practical feedback.

- Assisted with Java and Docker, checking work with an experienced reviewer.
- Kept organised work records and developed clear handover habits through supervised practice.

EXPERTISE

Core capabilities

TypeScript

Java

PostgreSQL

API design

Docker

Integration testing

SELECTED WORK

Order orchestration

Service contract, decision log and integration-test report

Release confidence

Release runbook and rollback rehearsal

LANGUAGES

English - professional working

Hindi - professional working

CAREER CONTEXT

11 years in this illustrative career.

Three appointments.

Full work examples on page 2.

03 Engineering case studies

Reliable systems. Thoughtfully built.

WORK EXAMPLE 01 / ILLUSTRATIVE

Order orchestration

Context

Duplicate events left orders in conflicting states.

Contribution

Designed idempotency keys, a transition ledger and replay tests; separated the service changes from the wider platform rollout.

Prepared for handover

Service contract, decision log and integration-test report

WORK EXAMPLE 02 / ILLUSTRATIVE

Release confidence

Context

Release knowledge lived in individual engineers' notes.

Contribution

Built a versioned release checklist and health-check endpoints, then tested recovery paths with the on-call team.

Prepared for handover

Release runbook and rollback rehearsal

04 Education

2013 – 2015

M.Tech in Software Engineering

Asterbridge Institute of Professional Studies
Specialist study with a practice focus on TypeScript and Java.

2009 – 2013

Bachelor of Technology / Science in the relevant discipline

Cedarhaven College of Applied Studies
Foundation study, practical assignments and supervised learning. Fictional institution and qualification record.

05 Professional development

2024

TypeScript - advanced practice workshop

Scenario exercises and peer review in event-driven services and maintainable product platforms.

2025

API design - reflective practice seminar

Applied learning reviewed through a bounded example and a written reflection.

Continuing learning examples, not licences or independently verified certifications.

06 Practice & evidence notes

Work focus	Evidence status	Contribution scope
Event-driven services and maintainable product platforms	Illustrative work descriptions; no source artefacts attached	Owned the stated workstream, not all team outcomes

Every employer and institution in this CV is fictional. The two work examples describe individual contributions; supporting artefacts and externally measured outcomes are not supplied. Replace example information with accurate records and permission-cleared work before using this CV.
